

# Gestempelte südgallische Reliefsigillata (Dragendorff 29) aus den Werkstätten von La Graufesenque

Gesammelt von der Association Pegasus –  
Recherches Européennes sur La Graufesenque

Over the last decades, an international group of specialists has collated the entire range of stamped Dragendorff 29 vessels from the pottery workshops at La Graufesenque. Thus one of the largest group of finds relating to the Archaeology of the Roman Provinces has been brought together to form a basis for modern scientific study. All finds represented in the Corpus have been recorded on a 1:1 scale by rubbing and are shown in their original size.

The Corpus contains 3400 stamped vessels from throughout Europe, with one third from La Graufesenque. They are in alphabetical order of potters' names.

The collection is published in loose sheets in 13 ring-binders, thus enabling the inclusion of possible later additions. Approximately 2100 pages. ISBN 3-88467-082-4.

Price for direct orders from the RGZM: EUR 395.- (4 Supplements included).
